EDUCATION

California State University, Long Beach

Bachelor of Science in Computer Science

August 2021 - May 2025

- Achieved Dean's Honors List 3 times

TECHNICAL SKILLS

Languages: CSS/HTML, JavaScript, C++, C, Swift, Python, C#, Java, Haskell, SQL

Developer Tools: Github, VS Code, Xcode, Visual Studio, Figma, MacOS, Google, CLion, Linux, VirtualBox, Windows, Microsoft, Firebase, MongoDB, DataGrip

Frameworks/Libraries: [Next.js](#), [React.js](#), [Node.js](#), .NET, NumPy, Matplotlib, PyTorch

UNIVERSITY PROJECTS

Roulee | *Swift, Xcode, Firebase, Figma*

September 2024 - May 2025

- The **lead UX/UI designer & developer** in a team of 5 to design an IOS mobile application to help users decide **where to eat** through **interactive, game-like features** and real-time restaurant suggestions.
- Designed the logo, app icon, and various app features using **Figma** to create an intuitive user interface to enhance decision-making through gamification, and implemented the designs in **Swift (Xcode)**.
- Ensured in-app interfaces met **design specifications** to achieve precise consistency with our **high-fidelity design prototype**.
- Communicated with team members through **Trello** and **Discord** for **sprint planning** and **backlog grooming**.

Zomb.io | *HTML, CSS, JavaScript, Firebase*

October 2024 - December 2024

- Handled the UX/UI of a **multiplayer online eagle-eyed zombie shooter game**.
- Designed the **web browser theme** using HTML, CSS and JavaScript to create a dynamic user interface for engaging gameplay.
- Managed the **users' interactions** like buttons, textboxes, and certain graphics in **JavaScript**.
- Consistently **troubleshooted and debugged** to maintain a seamless user experience.

End-to-End IoT System | *Google Cloud, Dataniz, MongoDB, Python*

December 2024

- Built a **system architecture** designed to facilitate communication between a **TCP client and server**, enabling the retrieval and processing of **IoT sensor data** created in **Dataniz** and stored in a **MongoDB database**.
- Designed the TCP client and server using **Python** to construct **MongoDB queries to fetch data** based on specified topic & time range, filtering data for the past 3 hours.
- Ensured TCP server **listened for incoming connections** from the client, **processed queries** received, retrieved relevant data from MongoDB, and sent back the computed results between **VM instances**.

WORK EXPERIENCE

Front of House Team Member | Chick-fil-a, Carson, CA

October 2025 - Present

- Maintained high standards of customer service in a fast-paced, high-volume work environment
- Handled point-of-service (POS) computer system for customer order taking
- Communicated and coordinated with team members to ensure seamless service

VOLUNTEER EXPERIENCE

Middle School Cross Country Meet | Long Beach, CA

May 2019

- Helped with organization of the courses for the athletes
- Provided aid, refreshments, and gifts to guests and athletes and created an encouraging environment for all parties

Female Leadership Breast Cancer Awareness @ Homecoming Football Game | Long Beach, CA

October 2019

- Sold Breast Cancer Awareness items at the entrance and on the bleachers
- Educated and encouraged people to help support our cause
